Kolar, India

ABOUT ME

Enthusiastic AI & ML engineering student with hands-on project experience in machine learning and data visualization. Certified by Oracle, IBM, Fortinet, IIT Kanpur, IIT Madras, and IISc Bengaluru across domains including cloud computing, cybersecurity, and generative AI. Eager to contribute to internship, research, and entry-level roles in AI, data science, and cloud technology.

EDUCATION

Bachelor of Engineering (AIML), HKBK College Of Engineering, Bangalore	8.7 CGPA	2023-2027
(still pursuing , Affiliated with VTU, Belagavi)		
Pre-University (PCMB), Vidya Jyothi PU College, Kolar	84.5 %	2020-2022
SSLC Karnataka State Board, Chinmaya Grameena Vidyalaya, Kolar	95.6 %	2019-2020

SKILLS

- **Programming Languages:** PYTHON, C, JAVA
- **AI & ML:** Machine learning, Artificial Intelligence, Generative AI, Predictive Analytics
- **Databases:** MySQL, MongoDB
- **Developer Tools:** Git, GitHub, Command Line Interface (CLI)
- **Data Science & Analytics:** Data Analytics (R), Power BI, Tableau, Data Visualization
- **Computer Science:** Data Structures, Algorithms, Object-Oriented Programming (OOP), Cloud Computing, Distributed systems, Oracle cloud Infrastructure (OCI), Cybersecurity fundamentals
- **Soft Skills:** Problem Solving, Communication, Quick Adaptability, Leadership, Team Collaboration

PROJECTS

Crop Yield Predictor using AI and ML

- The Crop Yield Prediction Model is a machine learning–based system developed to estimate the expected crop production for a specific region using historical agricultural data, weather conditions, and environmental factors.
- The goal of the model is to help farmers, researchers, and agricultural planners predict crop yield in advance, enabling better decision-making for farming activities.
  https://mahantheshvinu.github.io/astrava/

TRAFFIC PULSE Bengaluru Urban Mobility Intelligence (Demo Model)

- A traffic analytics visualization system Live BLR Traffic Intelligence System is a web-based traffic monitoring and visualization platform designed to analyze and present real-time traffic conditions across key routes in Bengaluru.
- The system provides users with intuitive insights into congestion levels, accident data, and route efficiency through an interactive dashboard.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — Oracle
- Fortinet Certified Fundamentals Cybersecurity — Fortinet
- Data Analytics using R – Beginner — Infosys Springboard
- Cloud Computing and Distributed Systems — Indian Institute of Technology, Kanpur
- Hands-On Developers Guide to MongoDB 4.0 — Infosys Springboard
- Introduction to Data Science— Infosys Springboard
- Introduction to Generative AI —Simplilearn
- Mastercard - Cybersecurity Job Simulation— Forage
- Introduction to Cybersecurity— Cisco
- Artificial Intelligence Fundamentals—IBM
- C Programming and Assembly Language Indian Institute of Technology, Madras
- CompTIA IT Fundamentals: Operating Systems— Skillsoft
- Programming Fundamentals: Command Line Interface & Operating System Commands— Skillsoft
- Mathematical Foundations of Machine Learning —Indian Institute of Science, Bengaluru
- Discovering the Autonomous Enterprise— SAP

ACHIEVEMENTS

- Fluxus 2025 (IIT Indore) — Finalist for Face Recognition System
- Smart India Hackathon (SIH) 2025 — Participant
- CodeCarnage 24-Hour Hackathon — Participant

LANGUAGES

Kannada, English, Telugu, Hindi
