VINUMAHANTHESH G

Pre-Final year student, AIML- HKBK COLLEGE OF ENGINEERING

+91 8951252766 | Bengaluru, Karnataka , India | office.mahanthesh@gmail.com | https://github.com/MAHANTHESHVINU

www.linkedin.com/in/mahantheshvinu

ABOUT ME

Enthusiastic AI & ML engineering student with hands-on project experience in machine learning and data visualization. Certified by Oracle, IBM, Fortinet, IIT Kanpur, IIT Madras, and IISc Bengaluru across domains including cloud computing, cybersecurity, and generative AI. Eager to contribute to internship, research, and entry-level roles in AI, data science, and cloud technology.

EDUCATION

HKBK COLLEGE OF ENGINEERING, BENGALURU(AFFILIATED WITH VTU,BELAGAVI)
Bachelor of Engineering (B.E.) – Artificial Intelligence & Machine Learning
September 2023 – October 2027
CGPA: 8.75 (Still Pursuing)

VIDYA JYOTI PRE-UNIVERSITY COLLEGE
Pre-University (Class 12 – Higher Education)
June 2020 – July 2022
Percentage: 84.5 %

CHINMAYA VIDYALAYA
Schooling (Class 10)
September 2009 – September 2020
Percentage: 95.6%

SKILL

- Python(Language)
- Artificial Intelligence Fundamentals
- Generative AI
- Data Analytics (R)
- Cloud Computing
- Cybersecurity
- Distributed Systems
- Communication
- Team Lead
- Power BI
- Tableau
- Data Structures
- Algorithms
- OOPS
- Git/Github
- Problem Solving
- C (Programming Language)
- Machine Learning

LANGUAGES

- Kannada
- English
- Hindi
- Telugu

PROJECTS

- **Crop Yield Predictor using AI and ML**
  - The Crop Yield Prediction Model is a machine learning–based system developed to estimate the expected crop production for a specific region using historical agricultural data, weather conditions, and environmental factors.
  - The goal of the model is to help farmers, researchers, and agricultural planners predict crop yield in advance, enabling better decision-making for farming activities.

    https://mahantheshvinu.github.io/astrava/

- **TRAFFIC PULSE** Bengaluru Urban Mobility Intelligence(Demo Model)
  - A traffic analytics visualization system
  - Live BLR Traffic Intelligence System is a web-based traffic monitoring and visualization platform designed to analyze and present real-time traffic conditions across key routes in Bengaluru.
  - The system provides users with intuitive insights into congestion levels, accident data, and route efficiency through an interactive dashboard.
  - The application focuses on enhancing urban mobility awareness by simulating traffic analytics and enabling users to understand traffic patterns in high-density areas such as Hebbal and Silk Board.
  - It leverages modern frontend technologies to deliver a responsive and user-friendly interface.

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate**
  Oracle
  Issued Oct 2025 · Expires Oct 2027
- **Fortinet Certified Fundamentals Cybersecurity**
  Fortinet
  Issued Sep 2025
- **Data Analytics using R - Beginner**
  Infosys Springboard
  Issued Nov 2024
- **Cloud Computing and Distributed Systems**
  Indian Institute of Technology, Kanpur
  Issued Apr 2025
- **Hands-On Developers Guide to MongoDB 4.0**
  Infosys Springboard
  Issued Feb 2025
- **Introduction to Data Science**
  Infosys Springboard
  Issued Sep 2024
- **Introduction to Generative AI**
  Simplilearn
  Issued Mar 2025
- **Mastercard - Cybersecurity Job Simulation**
  Forage
  Issued Mar 2025
- **Introduction to Cybersecurity**
  Cisco
  Issued Mar 2025
- **Artificial Intelligence Fundamentals**
  IBM
  Issued Feb 2025
- **C Programming And Assembly Language**
  Indian Institute of Technology, Madras
  Issued Nov 2024
- **CompTIA IT Fundamentals: Operating Systems**
  Skillsoft
  Issued Oct 2024
- **Programming Fundamentals : Command Line Interface & Operating System Commands**
  Skillsoft
  Issued Oct 2024
- **Mathematical Foundations Of Machine Learning**
  Indian Institute of Science, Bengaluru
  Issued May 2026
- **Discovering the Autonomous Enterprise**
  SAP
  Issued Jun 2026
